

**COMING SOON!!!**

We have embarked on a research project about: **“POWER IN THE VIRTUAL SPACE”**

We explore questions such as:

- What makes it that a person has power in the virtual space or not?
- What are typical behaviors dis-empowering others virtually?
- Are virtual psychodynamics related to power similar or different from face-to-face situations?
- How can leaders exercise productive power in the virtual space?

If you wish to learn from this research and find out about the results, please send us an email at [support@black-gazelle.com](mailto:support@black-gazelle.com) and we will be delighted to register your interest.

**19 Executives from 10 global companies** (corporate and public organizations) are **involved in the research.**
